

# Cole-Parmer® Single-Use Pump Head for Masterflex® L/S® Drives

## Get steady, pulseless flow with the convenience of snap-in disposable heads

- Ideal cost-effective solution for single-use or single-campaign fluid transfer
- Disposable—eliminate cross-contamination and cleaning
- Deliver flow rates up to 500 mL/min at speeds up to 100 rpm
- Pump fluids with viscosities up to 70 cps; pressure up to 2.5 bar (36 psi)
- Steady, repeatable flow is ideal for dosing applications

Achieving steady pulseless fluid transfer couldn't be easier—simply mount the reusable adapter onto your Masterflex L/S drive and snap in a clean, disposable pump head! Standard luer connectors offer quick and secure connections to inlet and outlet tubing.

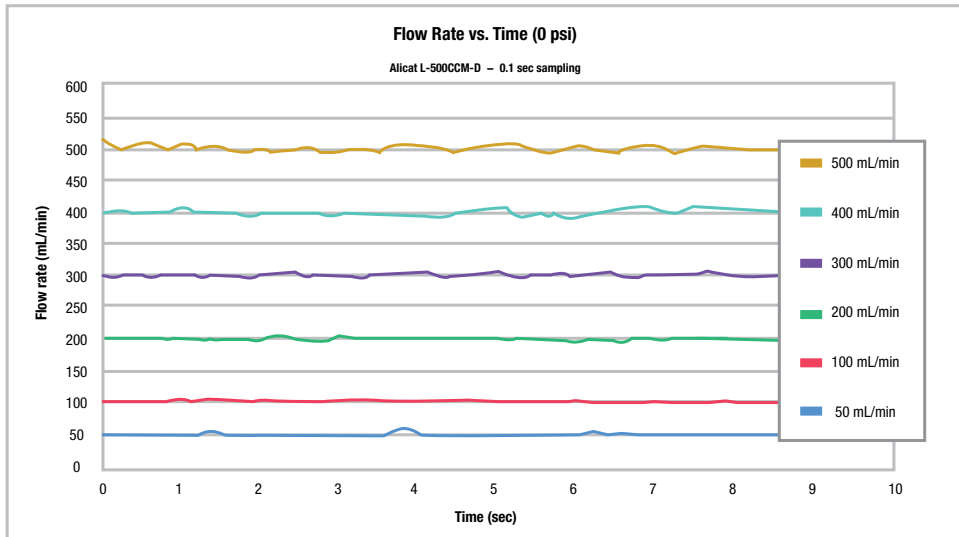

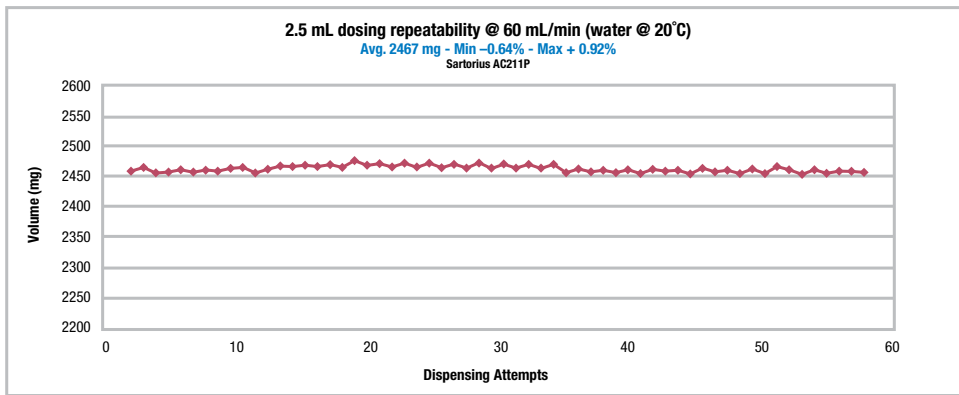

Mount the adapter to your Masterflex L/S drive and snap a pump head into place.

Rotary volumetric pistons produce a steady, pulseless flow with high volume and flow rate accuracy. The consistent rate of flow over time from the dual pumping chambers minimizes the need for calibration.

**Note:** Maximum recommended speed is 100 rpm for optimal life and performance. Expected pumping life is 18 hours at 50 rpm.
